Assessor Comments	51 EU accredited Angus weaner steers. Weighed into a 50kg weight bracket! These calves were weaned on 7th February (12 weeks) onto a specialized calf weaning mix consisting of straw, almond hulls, cotton seed & canola meal. They have weaned incredibly well & have well & truly turned the corner & are now putting on weight!! High end genetics have been sourced from Rennylea, Pathfinder & Barwidgee with a strong emphasis being placed on temperament, growth & doing ability. Vendor regularly spends \$20-25K on bulls. The Mooramook steers are often sought after by repeat purchasers & have been described as "Elite performers". Health treatments at weaning include; Dectomax V injectable drench & vaccinated with 5 in 1, Vitamin ADE & Multi-min. With an exceptional genetic profile, a sound animal health program, a big 12 week weaning & EU accredited, these steers tick all the box & come with my highest recommendation. ** Please note that vendor has another 231 steers also in this sale**
