Vendor Comments	Approximately 17.5-18 micron wool (as lambs).
Assessor Comments	Complete drop of Merino wether lambs, less a tail (10%) drafted off as culls and retained by the breeder to sell at a later date. The assessed group of lambs would normally be sold through the saleyards to processors, but this season as not enabled that. The August/September drop lambs should have plenty of time in their teeth and therefore potential for the restocker. These March shorn lambs provide the restocker with various options going forward, including: * With the right feed conditions, lambs could be fattened and sold later in the Spring. * Being March shorn, with already a bit of start in the jacket, there is potential for classing of these lambs while they still have their lambs teeth * Furthermore the classed, quality line could be retained by the purchaser as short or long term wool cutters into 2026 and beyond.
