Assessor Comments	A 2 deck line of good Calendar year branded beef master heifers and their crosses; these cattle have been bred with a focus on Disposition, Fertility, Weight, Conformation, Hardiness, and Milk Production. These heifers have had a good season and will have good weight for age - they'll make good backgrounder heifers to grow into feeder or slaughter weights & with a light draft would make good future breeders if so desired. The heifers have been identified with a yellow button and put back in a fresh paddock with their mothers until delivery. It was also noted that some of the #4 heifers may have been self weaned evident in the fat coverage The 26 #4 heifers range from 227 - 350kg @ assessment to average 292.2kg The 54 #5 heifers range from 206 - 334kg @ assessment to average 247.5kg All cattle were DRY curfewed at assessment Buyers note 4 deck run of steers also available in this sale
