Assessor Comments	68 Angus x Angus steers, 8 to 10 months of age, weaned and currently running on crop for the past month. The cattle were			

originally purchased over the last 8 months on cows, then split, weaned, and introduced to crop. The steers are carrying their winter coats and present with plenty of frame but little condition, appearing to have just started responding to the crop. They have an average curfewed weight of 275kg. Please note, there is some evidence of old ringworm scarring, which is not considered detrimental. A total of 136 steers will be offered, split into two even lots of 68 and sold as "run out the gate."
