Joining Details	Not Station Mated		
Any Access To Bulls or Stags?	Yes, last access to bulls/stags: 30/06/2025		
Joining Access Details	Were exposed to bulls up until weaning as followers on the cows. Unlikely these would be cycling due to weight and age however no guarantees can be offered.		
Temperament	Yards	Crush	Paddock
	Quiet: 80 head	Quiet: 84 head	Temperament not assessed in
	Slightly Stirry: 8 head	Slightly Stirry: 4 head	Paddock
	Heifers considering they have only just been weaned were actually very good to handle in all areas of the yards. In the bigger yards there were some ring leaders that still have a small amount of trot in them which is quite normal and makes the balance follow the leader a bit.		
Handled With	Bikes , Horses		
Notable Traits	Traits		
	1 Head Fly rub		
	1 Head Light warts near eye		
Assessor Comments	Buyers a line of PCAS ELIGIBLE Brangus/Angus/Ultrablack Composite weaner heifers that are mainly flat back types and should be ideal to suit to background for domestic feeder entry weight specifications. There is a fair amount of variance in the breed content of these heifers so as a result some do have a small amount of hump and ear clearly visible in the video. These have only been off the cows for about 5 days and have already settled down very well temperament wise. I would suggest a fair amount of these have been self-weaned by their mothers and as a result I would envisage good compensatory weight gain provided they go onto some improved pastures or oats crops. These would also suit to grow out and keep as a future breeding proposition. All up at the property there are about 450 weaners being offered in the sale. Pre-treated for ticks.
