|                                       | Heifers worked well through the yards and were a pleasure to handle. A very small percentage of the heifers became unsettled in crush and when pressured which is common behavior for weaners, But settled once back in the mob, Cattle temperament is a credit to Vendors.                                                                                                                                                                                                                                                                                            |                                                             |                                     |
