Assessor Comments	67 Ideal feeder steers, more frame than weight in steers, running on short green medics with dry summer grasses. Still on the do albeit slowly. Will very much enjoy the change of scenery to either a feed pen or grass fattening enterprise. Above average results from major feedlotters in past years. Compensatory gain aplenty available. Assessed after overnight dry curfew. Can be delivered on same basis. (Dry O/N curfew & 0% deduction weighed Coonamble or Warren. Of first 40 steers mouthed, all but 5 were milk tooth, with one showing fully emerged 2 teeth and 4 just cutting. Highly recommended line of steers. 1 B/Baldie steer can be left out of mob if desired.
