Assessor Comments	Offering 240 Weaned Heifers over two lots of 120 as a run out the gate. Yard weaned in April these heifers are noted performers, bred in the hills of the South/East Slopes out of volume cows and coming out of a tight season in the south. Bred on principally Ardrossan, Hazeldean and Jarabee Angus bloodlines with a reputation for performing in both grassfed and feedlot environments. Heifers present in fresh store condition and will explode once shown some quality grazing conditions. Note quite a number of heifers are displaying ringworm scarring around face/neck which you would expect to improve once we get into the warmer months. Heifers would suit either the breeder to take on in a breeding program or to take out to a heavy kill heifer. PCAS Grassfed and Greenham Never Ever declaration available at purchasers request. Note a 20% tail removed at assessment. Photos and videos are of all 240 heifers being offered in this sale and sold as a run out the gate.
