			Paddock
When moving from the paddock to the yards they were content and grazed the sides of the road. Got a little quick on their			

	feet when realizing they were corned in the yards. Walked up the race to the scales without any push but got a little eager to get of the scales once trapped in there.

Assessor Comments	Tops of the Drop none retained out of 160 heifers. Well bred Heifers that have plenty of frame and stretch to grow into ideal future Breeders. Noted performers in backgrounding and feedlot operations with a tonne of breeding. These heifers are grass fed only and antibiotic free for any producer wishing to target that market. Heifers that will grow frame over the winter months and will only need spring feed to polish them off. Please note there are 7 heifers that do have a splash of white around the teat area. A small percentage of the cattle are showing ringworm but not detrimental.
