Assessor Comments	A quality line of young steers that present in forward condition with tremendous length, frame and bone. Cattle that have a wealth of breeding from a solid cow herd by high index bulls which is well reflected in the style of animal that make up this line. The steers have been marked a tad later in life but have softened beautifully and are clean underneath. Pure bred line of angus steers with 5 head that have a smoky coat. Note - It is estimated that 50% of the draft have been treated with Orbenin Eye Ointment at some stage as a calf for pinkeye treatment or if they had a clinical case of pinkeye antibiotics were injected into the eyelid to drizzle over the eye. # Calves identified at assessment with - 5 Head with old ringworm scars that were hairing over. 19 Head had evidence of a cloudy eye (2 head with both). 3 Head with a faded white dot on the eye - in the assessor and the vendors opinion none of which are detrimental to the animal's health or productivity.
