Assessor Comments	*** EU HERD DISPERSAL *** A Great opportunity presents to secure a large run of well bred Young Angus PTIC Cows with over 20 years of breeding and cattle that have a very good reputation for breeding quality weaners in the New England over many years. Cows originally were owned and bred by the shearer family and have only recently changed ownership through the recent sale of the Blair Hill Station, A great trading opportunity was seen by the new owner and now offer these cows to the wider market. Cows have a great breeding background with quality angus genetics being used from Sara Park, Eastern Plains and Wattle Top Angus Studs to be the back bone of this quality cow herd. There is a run out the gate of 156 of these 4 & 5 year old cows that due to calve soon to quality home bred sires from the breeding program of the Shearer family. These young moderate framed females are proven breeders that consistently produce quality sort after weaners here in the New England, Don't Miss these.										
Assessor	Steve Daley (Level 1 Accredited)
