| Assessor Comments      | A good line of Angus first-calvers, with Cornerstone & Kennys Creek Angus sired calves at foot. These heifers are currently medium in frame, with good conformation & softness, with further development expected as they mature into their full breeding potential. The calves at foot, which were marked & vaccinated at assessment (9 steers, 8 heifers), are very even & possess excellent softness & shape. Heifers are very even in type & frame, despite some variance in weight, which is due mainly to a variance in fat score, ranging from store to forward fresh condition, having only had access to a very short pick of feed due to dry Autumn conditions. Heifers have been running with the vendors Te Mania Angus bulls since calving. A great opportunity to secure a quality line of replacement breeders, with a very even line of Angus calves at foot, Vendor is offering another a line of 24 x 24 top quality Angus first calvers this sale also, which are the sisters to the white tag heifers in this mob. |                           |                                           |             |                |
