Assessor Comments	A quality line of PTIC Brahman heifers, all one brand and presenting as a very tidy and even draft of future breeders. These heifers were originally sourced from St Lawrence with the intention of growing them out for joining and reselling as a quality line of pregnant females — and they have certainly met expectations. They are quiet to handle in the yards and muster well on horseback with dogs. The heifers were joined to an Angus bull for the first month, followed by a low birthweight Kandanga Valley Charolais bull for the remainder of the joining period. They've been running in steep forest country and are well accustomed to lantana. A genuine opportunity to secure a well-bred, well-handled line of PTIC Brahman heifers with great breeding potential.
