| Assessor Comments | A small line of well bred heifers that didn't quite suit the vendors calving time frame, These heifers were pregnancy tested and foetal aged and should calve in a tight 4 week period from 5/9/25 to 3/10/25, Historical use of short gestation bulls could result in a couple of early calves, Overall these young breeders present in ideal condition to calve, The Coonmoor herd is renowned for the performance of its progeny with many past buyers returning year on year to purchase them , Prospective buyers looking to start a herd or top an existing herd are encouraged to look at these young, fertile and structurally sound young ladies, *Please Note 3 Heifers with slight pinkeye scarring that's not detrimental to their vision |
