These heifers were really gentle to draft. They penned up well and flowed up the race well. The few that were not settled in the crush settled quickly when back with the mob. They have been very well handled by the vendor with horses' dogs and bikes and have been mustered and moved since weaning a number of times. They were a lovely quiet mob to walk through and take photos with no sign of panic or flight

Handled With

Bikes , Dogs , Horses , On foot , Vehicles

Assessor Comments

A ripping line of light weight, cross bred, well-handled heifers on offer here. All the hard work has been done; they have been weaned 7 weeks and are all in healthy store condition and ready to power ahead on good feed. They are a mix of breeds and would suit the feeder market or would grow out to be future breeders. These cattle have the genetics perform well and past sales show they do. They come from a cow herd that is preg tested annually and has a strong focus on fertility. They are very well handled and easy to work with. These heifers have been pretreated on 4/8/25 for tick with Starmec injectable. It was noted that 2 heifers have a small amount of rain scald on his forehead and there is one heifer with a torn ear from tagging.
