Hard to be critical on their temperament as they are unweaned, however they come from a good quiet cow herd.

Handled With	Dogs , Horses
Assessor Comments	Neat half deck or body load of backgrounder steers, located in tick free zone. These steers will grow out to great feeders or bullocks. They will be delivered on farm and unweaned. There was sign of lice so have been treated at assessment with Cattle guard pouron. Approximately on visual inspection about 4 of these steers have been weaned by their mothers already. These are good well bred steers, I recommend them.
