Assessor Comments	A nice two deck consignment of Angus feeder heifers. Preg tested empty heifers from a larger line of heifers that went through an AI program. These empties now present as ideal feed on heifers. In fresh condition carrying no excess cover, heifers that will feed on quickly. They have had all health treatments throughout their time here along with the most recent treatments in June. As mentioned earlier in the assessment a random selection of heifers were mouthed as they came through the crush with one heifer having her two teeth up balance being solid milk teeth, in line with what would be expected from this age group. Happy to work in with your intake requirements if you need to extend the delivery period by a few days no stress on our end. Offering on a dollars per head or Liveweight basis weighed @ Grainforce in Bathurst. Quality feeder heifers worthy of close consideration.
