Assessor Comments	A very good line of 27 x Aug/ Sep 2024 Drop Angus Heifers. Quality heifers that are by high indexing Hazeldean Sires bred from a large framed cow herd based on Hazeldean and historically Rennylea blood. The heifers present well as a group and exhibit depth and bone. Suitable heifers for joining or backgrounding, they are grass fed eligible. The heifers have performed very well given the seasonal conditions at Goulburn, they have spent the last 4 weeks on crop, the remaining time since weaning has been on pastures with no supplementary feeding. The Cheetham family focus on breeding females with shape and carcase, focusing on high growth and positive fat ebvs. Approx 35% of the heifer's exhibit rubbing from lice.
