Cattle are culled from the herd annually on temperament. This has led to a very quiet cow herd producing progeny that are easy to work with. These heifers have been well handled from a young age and show excellent temperament.

Assessor Comments	An excellent quality line of EU Accredited heifers backed by years of top genetics. The Belmore herd has been using Injemira and Yavenvale genetics for many years. These heifers are from large framed, deep bodied cows that consistently produce excellent progeny and sired by top quality Reiland Angus bulls. These heifers show good bone and type making them ideal future breeders. Due to a change in management direction these heifers will be offered for sale. They are the top draft of the Autumn drop heifers that would usually be retained. These heifers are very even all being in a tight 66kg weight bracket from 340-406kg at assessment. Heifers are not usually offered to the market making this a rare opportunity to buy genuine classed in females suitable to breed or feed.
