Assessor Comments	A very good line of 153 Brahman #4 steers presenting with plenty of frame, weight for age, and strong bone. These steers display the structure and type to continue on and grow out into heavy feeders, or be taken right through to finish as bullocks. They are well-handled, even in type, and show the softness and growth required to perform under the right program. An excellent opportunity to secure a consistent run of quality Brahman steers with all the hard work done. There is only 8 hd which are under 300kg and 8hd over 400kg. Animal Health: • 2 doses of 5-in-1 • Longrange Botulism • 3-germ blooded Additional Notes: • A small percentage show evidence of old skin damage but appear recovered (see photos). • Steers moved quietly through the yards at assessment. • Vendor weigh/delivery point is either Clermont or Charters Towers Saleyards after overnight curfew in home yards. • Steers received a pre-treatment at assessment to aid clearance into tick-free areas.
