	These weaners have only been weaned for the past few weeks and are still fairly flighty. There are ring leaders that tend to move rapidly in the bigger yards and they need to be steadied down through a gateway, not unusual. Nothing in the mob that could be considered aggressive. Would encourage buyers to allow steers sufficient time to settle down on arrival prior to being shown the 'bush gate'. Would benefit from further weaning protocols and maybe tailed out.		
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs		
Notable Traits	Traits 6 Head Ring worm scars		
Assessor Comments	Buyers, 7-decks of Consuelo EU ACCREDITED and PCAS ELIGIBLE Santa backgrounder heifers being offered in one 3-deck and one 4-deck lot (279 head all up). These have developed a great reputation and been offered on A+ for the past 10 years and always seem to attract plenty of repeat buyers who have commented on the great performance these heifers deliver them. They have presented in store condition after the winter, and I would suggest these will really hit their straps on improved pastures or crop so would expect plenty of compensatory gains. The heifers show adequate growth and are probably the younger heifers in the crop hence the light weight. They are genetically very sound cattle and ideal to put away to heavier domestic feedlot entry weights. They would also suit to grow out and use as future breeders. Very difficult to buy large lines of straight Santa future breeder females. Clean country buyers note they are offered GUARANTEED CLEAR of the dip & should clear the dip on Saturday
