Notable Traits	
	Traits
9 Head	ring worm

Assessor Comments	Angus cross heifers that are averaging 1.65 kg's per day since they where last drenched. Bred out of genuine large framed holstein cows with no xbreds present in the herd. Some heifers are showing sign of ring worm but the hair is starting to grow back through. A great opportunity to purchase future breeders that will grow into large framed vealer mothers given the right opportunity. Heifers would also suit being continued on feed or turned out onto grass for the spring.
