Easy to handle steers that moved through the concrete yards easily and stood on the portable scales

Handled With	Bikes , On foot
Notable Traits	Traits 8 Head ring worm
Assessor Comments	Angus cross steers that are averaging 1.6 kgs per day since they where last drenched. Bred out of genuine large farmed Holstein cows with no xbreds present in the herd. Some steers are showing signs of ring worm but the hair is starting to grow back through. A great opportunity to purchase a well bred line of steers with the opportunity to keep feeding them or turn them out on grass for the spring.
