The heifers were very good to handle. They were hand fed through autumn and winter so are used to humans and vehicles. They haven't been through the yards a lot though were easy to handle.

Assessor Comments	115 vendor bred Angus heifers. They are a late Aug / Sep / Oct drop and were weaned in early April. All weighed from 174kg to 266kg to average 202kg full. The cows did a great job for the first 8 months though the season has made it tough for them since, the feed has been very short and weather has been cold. They handled very well through the yards and were very calm through the crush, as they have been hand feed pasture Hay twice a week since weaning. A tail of 80 was removed at assessment. No heifers have been retained, these are the tops of the drop on this property. Bred out of big frame Banquet and Western Vic bred cows and sired by Bushy Park bulls who have used a lot of Millamurrah semen. They are all frame with absolutely no fat, I expect if they go onto quality feed the weight gains will be excellent as they are light but not too far gone. There is 3 hfrs that had a small pinkeye scar (see photos), 4 had some ringworn on their face and approx 5 hfrs have lost a bit of fur.
