Assessor Comments	Offering 72 unweaned heifers. These weaners were 279kg live at assessment. The heifers show great weight for age and handled well though the yards for unweaned cattle. The weaners are out of large frame mainly crossbred cows with quality bulls used over them to produce well bred calves. The cattle are un-weaned and will stay on their mothers until delivery. This is a good mob of calves that have not had a set back in life and are ready to power ahead to feeder weights or be classed up and retained as future breeders.
