These steers are generally quiet to handle through yards and even had to be forced in some cases to move out of the way. The usual few got agitated in the crush but majority stood on scales without fuss. Well weaned and educated to yards.

Assessor Comments Offering a lovely line of vendor bred Angus feeder steers. Approx 1 B Double of Hazeldean and Kidman blood steers which are well grown for age and all milk teeth. One steer does show some Shorthorn heritage but predominantly black coated (see pics). Two steers are shorter in the leg but majority are good long steers that have the breeding to be heavy feeders even on a short feed regime. Some show rubbing over shoulders possibly due to heifers running with them. A couple of steers have small warts around the facial region (see pics). The cattle were very good to handle at assessment. They weighed between 395kg (2 head) and 520kg (1 head) to average 454kg after 4 hours in yards. They are forward store condition. The vendor also has a deck of Angus cross steers on offer this sale. These cattle show the benefits of selecting the better end of bulls at both Hazeldean and Kidman stud property sales. There are two management tags only due to family ownership split. All same cows, same bulls.
