Handled With	These heifers handled fairly well however some pushed and shoved in race, and were lively in vet crush while being weighed. They did however settle in the yard to be photographed. Behaviour not seen to be dangerous or troubling. And I expect that as they had only been drafted off their mothers the day before that they will settle down during the weaning program.					
	Bikes , Dogs , Vehicles					
Assessor Comments	A small but quality line of backgrounders with ample frame and genetics to grow into proper feeders and or heavy export slaughter grades. A great cross of genetics enhancing the growth and yield potential by using the Limousin. Same vendor has 15 full brothers to these heifers in same sale. These heifers are located only minutes west of Tara.
