Assessor Comments	A nice line of well grown, Angus heifers with their first calf at foot. These heifers are well developed, exhibiting good frame for age & plenty of stretch. These heifers are well bred & are presenting mostly in store condition, due in part to a reduction in feed throughout a very dry Autumn, but also their maternal instincts putting the nutritional needs of their calves above their own. Cows & calves alike, are set to thrive with access to more abundant pastures, & offer a great opportunity add substantial value by putting weight & condition onto the units throughout the warmer months of Spring & Summer. A sound opportunity to secure a quality line of young Angus breeders coming into the height of their production, which have calved unassisted to top quality Angus calves. With heavy old cows currently returning values exceeding \$3000, they offer real value & an attractive potential change-over opportunity into younger breeders, with calves at foot & change in your pocket.
