Handled With	Bikes , Dogs , Horses , On foot , Vehicles
Assessor Comments	A small but outstanding lot of F2 Speckle Park Heifers PTIC to start calving September, these heifers are rising 2 years and are in ideal calving condition, the heifers are the result of an AI program and are the absolute entire drop NOT CULLS, Heifers are preg tested in calf to JAD Questify (Q29) with a birth weight of -0.6 and has been previously used on heifers with no problems, This is a great opportunity to either start a Speckle Herd or Improve an existing one with a lot of time effort and research gone into breeding the heifers with great bloodline (Southern Cross Speckle Park- Minnimurra Montezuma and now JAD Questify), Heifers that tick all the boxes youth, size, frame , bone, temperament and breeding buy with confidence highly recommended
