Assessor Comments	Young Hereford cows with their second calf at foot and back in calf to the “Ennerdale” Hereford bull. These young females have years of production ahead of them and come ready to calve down later this year while also having a young calf at foot. These cows are well bred cows sourced from southern SA and Western Victorian herds, utilising top Hereford genetics as heifers, and have successfully had two calves already. Of the 46 calves at foot there is 40 sired by the Ennerdale Hereford bull and also 6 that are sired by the Angus bull. These cows come ready to make the most of the rising cattle markets as a genuine 3 in 1 article. Please note there is one cow with a lump in her jowl where a grass seed has been removed, refer to last photo.
