Assessor Comments	Buyers a nice line of PTIC Angus Cows. These cows were predominantly purchased from Timor Station as one line of first calf heifers. These Cows have produced a good quality Calf every year and have now freshened up after Calves being weaned 2 months ago. Cows present a good opportunity to add to an existing herd or a starter mob. Cows have been running with Angus Bull continuously. Preg tested at time of assessment with all Cows being 3-4 months in Calf. Please note 1 Cow was noticed at assessment having old scarring in eyes although not detrimental.
