Assessor Comments	Acc Hooper, 540 WS/Mo sucker lambs, Weaned, vaccinated and introduced to grain. This Is a RARE opportunity to purchase any Hooper XB lambs as they have "forever" finished them into great Export quality lambs by the end of September. They are meticulously bred from SWM merino ewes by Tongara W/Suffolk rams specially selected for "Good Butts"!! and renown Togara genetics of Positive Fat. These lambs were early weaned and have had access to barley through ground feeders their entire life. They are still fresh with the odd lamb being crutched after assessment for wet Dag, as the green grass has started to grow. EVERY LAMB has been weighed 25-35kg at assesment, and have been doing 170g/day for the past 3 weeks on next to no green feed, so they are sitting ready to grow to their potential.
