Assessor Comments	355 new season wether lambs on offer. This is the lead draft of their wether lambs, that have been weaned and introduced to grain. The season has been very difficult with green feed only available at the start of July. The lambs have freshened up since weaning. Approx. 30 head were removed from this mob. There is a small percentage of these lambs that have dried fluid under the eyes, from the dry conditions but there no problems with their eyes. Also there are some with scaley ears. Lambs to take onto heavier weights and shear. Top weight 28 kg, bottom weight 15 kg, averaging 19.8 kg at assessment, with 84% weighing between 17 - 23 kg.
