Assessor Comments	**COMPLETE DISPERSAL - PROPERTY SOLD** This lot represents the 3-5 year old Carlora Merino sheep joined to Merino rams for a late Sept lambing. Ewes are full wool and due to be shorn at the end of the month prior to lambing. Ewes are principally Greenland Merino blood lines with some hazeldean blood also used. Carlora had a strong focus on wool quality, in particular micron with the mature flock averaging around 17 micron. Sires used on Carlora were purchased out of the Greenland sale each year, as well as purchasing some ewes off the Alcock family each year. Ewes would benefit highly from a shearing, a precautionary backline and will be set up for lambing later in the year. Majority of the ewes are mulesed (portion non mulesed) and well as OJD vacc. These ewes would be a welcome addition to any merino enterprise, having lambed each year since hoggets. Tail removed at asssessmen Please note: Carlora also have SIL Blue tag ewes and SIL ewes joined to White suffolk lamb in the same sale.
