JD Approved Vaccinates	Sheep are not JD Approved Vaccinates.			
Vendor Comments	These are part of a normal turnoff. In the sample handled noted 3 with red colouring on the head (could be a genetic imperfection).			
Assessor Comments	Buyers, here is an excellent opportunity to purchase a large offering of Dorper wether lambs from the mighty Terrick flock, one of the largest and extremely well run Dorper operations anywhere in Qld. These are all out of Burrawang blood ewes with rams accessed from their company owned Burrawang Dorper stud that provide top genetics annually to their large breeding flock. These lambs presented fresh and lively and should continue to bounce ahead if they get access to nice fresh herbage further south. These suit a backgrounder to continue to grow out on herbage to heavier feedlot entry weights or right through to slaughter specs. Still young, plenty of time to get them there. There are also three heavier lines of 800 head in the sale totaling 2,400 lambs.
