	Quality Grades Excellent 30% Very Good 70%			
Notable Traits	Traits 27 Head slight photosynthesis on ears from Aphids in lucerne			
Assessor Comments	ALLEN RURAL offers an excellent run of primeline ewe lambs. The vendor has traditionally retained lambs as future breeders. The lambs are June-July drop and are up to date with their health treatments having received a Weaner guard at weaning and a Gudair vac. Suckers have been imprinted grain feeding on their mother's prior to weaning. The complete mob of lambs were weighed from 24.5 to 44kg with a 15% tail being removed. Lambs have been grazing on lucerne and are steaming ahead. An excellent opportunity to purchase a run of future breeders. Buyers note 10% of the mob have been slightly effected on the ears by photosynthesis, caused from Aphids. Don't hesitate to call.
