Quality Grades

Excellent	30%
Very Good	70%

Notable Traits	Traits
	120 Head slight photosynthesis on ears from Brassica

Assessor Comments	ALLEN RURAL offers an excellent run of primeline wether lambs. The vendor has traditionally retained lambs to be grown out to trade and export weights. The lambs are June-July drop and have been imprinted grain feeding on their mother's prior to weaning. Suckers are up to date with their health treatments. There is a total of 1025 suckers sold over two lots, with a 10% tail being removed. Lambs have been grazing on braccisa up until the assessment and are steaming ahead. An excellent opportunity to purchase a large line of store lambs. Buyers note 20% of the mob have been slightly effected on the ears by photosynthesis. Don't hesitate to call.
