Assessor Comments	Well-Grown Connewarran Blood Ewe Lambs – Shorn, Supplemented & Ready to Perform A tidy line of Connewarran blood ewe lambs, originally classed out and purchased in June, now presenting in strong condition and showing excellent growth. Since purchase, these lambs have been well managed on lick feeders with barley and vetch hay, ensuring consistent weight gain and development. These lambs are on track to become productive woolgrowers and quality breeders, given the right management. They were shorn on 01/09/25, and have been vaccinated with 6-in-1 and B12, ensuring they are primed for continued growth and performance. Please note: Approximately 15 ewe lambs in this line have come from another property and have not been mulesed. An ideal opportunity to secure a small, well-prepared line of young ewes with strong genetics and great potential.
