Assessor Comments	Timely rain at the commencement of lambing gave these lambs a great start & have not had a check since although starting to dry off . 8% of the tail were removed prior to assessment , there were 2 of the assessed lambs with slight wether horn . They will need to be crutched or preferably shorn with a tidy jacket on there backs , please refer to wool photos with grown sheep averaging 19 microns . Vendor has been breeding them big & bold with a plainer body , these lambs are testament of they're efforts .
