Assessor Comments	A outstanding line of 440 2nd cross suckers by Poll Dorset rams. All 880 suckers have been individually weighed and split into 2 sale lots for buyers convenience. These suckers weighed between 28kgs to 34.5kgs and average 31.4kgs. These suckers have been weaned and drenched on the 2nd of October and have been running on oats since weaning, They were also trail feed on barley while still on the ewes. These suckers present a outstanding opportunity to put together a large line of well bred 2nd cross suckers that are moving forward and are highly recommended.
