Assessor Comments	A quality line of primeline cross ewe lambs selected from twin-bearing genetics. The vendor has traditionally retained lambs as future breeders. The lambs are April- May drop and are up to date with their health treatments having received Q-drench and 5-in-1 at weaning and a Gudair vac. The lambs have also been market crutched. Lambs have been grazing on a lucerne dominant pasture and are steaming ahead. An excellent opportunity to purchase a run of future breeders or store lambs.
