Health Treatments	Drenched	18/05/2025	WD COMBO				
Health Declaration	A National Sheep Health Declaration will be provided at Delivery AT BUYER REQUEST						
JD Approved Vaccinates	Sheep are not JD Approved Vaccinates.						
Vendor Comments	124 Excellent 1st X E/L. Bred out of GLENWOOD SRS Merino ewes & sired by high indexing GLENEITH B/L rams with fertility and mothering ability a major focus. Quality Genetics that tick all the boxes, Outstanding asset to add to your future flock.						
Joining Details	Not Station Mated						
Any Access To Rams or Stags?	Yes, last access to rams/stags: 01/05/2025						
Joining Access Details	Only 1x ewe visibly showing signs of being in lamb. This was a mis-joining to a Border Leicester Ram. Ram got in for very short period.

Assessor Comments	Excellent line of 124 x Aug/Sept 2024 drop, 1st Cross ewe lambs, bred out of large frame 'GLENWOOD' blood SRS dual purpose merino ewes and sired by high indexing 'GLENEITH' Border Leicester rams. The Rice family spare no expenses when selecting there breeding genetics as Glenwood target "early growth, moderate mature weight, positive muscling, and fat which is paramount to ensuring the flock is highly fertile, resilient and easy care". Having high Indexing rams from GLENEITH really gives these ewes the depth, fertility & maturity to be an asset for the purchasers intended breeding program. Weight range 47 - 73kg averaging 58kg liveweight. E/L are at the right age/weight to be joined to intended purchasers ram straight away. @ Assessment due to the rich nourished river country feed ewes displayed heavy dag but will be bunged at delivery if buyer requests which is deemed non detrimental. OPPORTUNITY AWAITS "Breeding females are the future of the industry."
