Very Light Type: Clover

Very Light Type: Barley grass

No known contact with shedding breeds

Healthy pink skins

Ewes were doing it tough leading up to shearing so some may be rough shorn due to conditions of sheep. Very odd barley grass seed on the outside of the wool.

Assessor Comments	True first cross ewes (border Leicester x merino) in the prime of their lives. Big framed ewes that average 71kg liveweight after an overnight curfew. Ewes are proven breeders and are in the prime time of their lives. Having weaned majority of lambs 3 weeks ago ewes are improving everyday and will be ready for a spring joining. Note that a handful (4) of late drop lambs were removed at assessment. Genuine reason for sale as ewes are normally retained until broken mouthed.
