Any Access To Rams or Stags?	To vendor's best knowledge, this lot has had no access to rams or stags.		
Assessor Comments	Well bred line of 2020 drop NSM 1st X Composite ewes for the Warralong ewe dispersal. Ewes were all scanned in lamb this year and have recently had lambs weaned from them. Ewes were shorn early September, are really starting to respond with the change in the season, and will be an ideal article to join late spring if required. Ewes are predominately solid medium to large framed types. Vendor has been on Kelso genetics since 2018 and has produced sound breeding results utilising this program with all ewes being joined to Poll Dorset sires annually. 2nd x progeny of these ewes generally finished for domestic markets. Vendor offering a total of 1215 in this dispersal. Ewes carry a clean bill of health and stand in forward store to slightly forward condition. Any ewes mouthed at assessment were found to be sound. Please call for further information. Please note mob count may slightly change at delivery. Very small percentage of ewes appear to carry a light mulse(sub 4%)
