Assessor Comments	**FINAL STAGE - DISPERSAL** This lot represents the final stage of the Carlora dispersal. These ewes are Greenlands & Hazeldean blood with Greenland & Main Range Merino lambs at foot. These ewes are still currently lambing but a portion of them would have lambed and lost lambs but due to the risk of mismothering, are going to be sold as a job lot. Whilst care will be taken at loading not to load anything on the point of lambing, agent recommends not transporting further than 300kms when trucking. These are good quality sheep that are lambing through a very tough Monaro winter and would respond well to crop or improved pastures. Ideal opportunity for a trade in very strong sheep and lamb markets.
