Joining Access Details	Heifers had access to Angus Bulls when on their mothers prior to weaning. The lead of these heifers could be early in calf. Would recommend a PG needle to the lead heifers if not wanting them to be pregnant.

Assessor Comments	Offering 36 Angus and Angus Cross weaner heifers. The heifers averaged 311kg live at assessment after an overnight curfew following weaning the previous day. The heifers are well grown soft types that will suit many markets as feeders or could be retained as quiet future breeders. The heifers are currently being yard weaned but will be handled in the paddock as well ready to turn out. Please note a few heifers were noted with lightly weeping eyes. Also note the vendor has another one deck line of steers in the same sale that may help with trucking.
