Vendor Comments

Very happy with this line of steers that would generally be taken through to heavy feeders or bullocks. Selling due to market conditions and to take care of further young steers coming through

	These cattle are a credit to the vendor. They work well in and outside of the yards. They are very well educated and as a whole they are a good docile mob of steers		
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , Horses , On foot , Vehicles		
Assessor Comments	This outstanding group of steers is a testament to the vendor's exceptional management practices. Their genetic potential, combined with compensatory gain, positions them for rapid weight gain in both feedlot and backgrounding environments. Notably, a significant portion of the mob has been assessed with milk teeth only, indicating their youth and growth potential. The steers have undergone rigorous tick control measures, having been plunge-dipped twice, and the vendor guarantees their delivery free of ticks to key locations including Nebo, Emerald, Rolleston, Moura, Clermont, and Gracemere. Typically marketed as heavy feeders or finished as bullocks, these steers have a reputation for superior performance. I highly recommend them to prospective buyers and encourage interested parties to contact me for further information.
