Vendor Comments	Vendor regularly competes in hoof and hook competitions and have in the past had success in the Dawson Valley Carcass Competition winning champion ribbons amongst large numbers involved.			
Temperament	Yards	Crush	Paddock	
	Quiet: 110 head	Quiet: 115 head	Temperament not assessed in	
	Slightly Stirry: 10 head	Slightly Stirry: 5 head	Paddock	
	Steers were very good to handle in all areas of the yards and also considered quiet when moving from yard to yard and in the crush they were quiet. Generally, the temperament is not an issue at all. Buyers should be warned however, most cattle need to be settled down on arrival after a truck trip and in strange surroundings before they are shown the bush gate. Vendors always present their cattle in an excellent quiet manner.			
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , Horses			
Notable Traits	Traits 1 Head Stumpy tail (brush only)			
Assessor Comments	Buyers, good quality weaner steers best described as "flatback" Composites. These have been bred in light forest type country so anticipate excellent weight gains on better quality heavy developed scrub soil country. Present in plain condition so most likely are mainly self-weaned so buyer should be advised you are not buying "butter balls" that will melt once you purchase them, rather should hit the ground running. Vendor has had great success in carcass competitions over many years and are doing an excellent job breeding flatback type cattle to suit the domestic supermarket trade. Vendor is a regular user of A+ and we are finding repeat buyers operating on these cattle regularly. Backgrounders advised to buy these and see how they perform, guarantee you'll be back for more. Note these will fit on a B-Double but there is an additional deck of steers slightly heavier to fill up a road train. One steer missing his tail brush but no detrimental issues with that.
