Temperament not assessed in
Paddock

Heifers were good to walk through in the yards and take photos. When working through the yards they were easy to block but at times did rush in the race prior to the crush. At the time of the assessment these weaners were on their first trip up the crush and once weaned should settle down well.

Assessor Comments

Offering 150 Angus Cross heifers. These heifers averaged 255.6kg live at assessment and were unweaned with the heifers going back on their mothers until delivery. This vendor bred line of heifers have all been sired by Texas Angus bulls out of mainly first calf heifers, hence they are lighter in condition. These heifers would make a tidy line of future breeders or equally suit a trade job for the backgrounder to go onto feedlot weights. Please note there were 3 heifers sighted with old blight scarring. Also note there are another 148 steers from the same vendor in the sale today.
