Steers were good to walk through in the yards and take photos. When working through the yards they were easy to block but at times did rush in the race prior to the crush. At the time of the assessment these weaners were on their first trip up the crush and once weaned should settle down well.

Assessor Comments

Offering 148 Angus Cross steers. These steers averaged 266kg live at assessment and were unweaned with the steers going back on their mothers until delivery. The steers have all been sired by Texas Angus bulls out of mainly first calf heifers hence they are lighter in condition. These steers are a nice line of vendor bred backgrounder steers that have minimal condition so plenty of compensatory gain potential. Please note there were 3 steers sighted with old blight scarring. Also note there are another 150 heifers from the same vendor in the sale today.
